

# ALIGN CYBERSECURITY™

A full suite of scalable IT solutions built for the Alternative Investment space

**Bespoke Cybersecurity Advisory Services** — Our Solutions Align Cybersecurity™ provides Cybersecurity Advisory Services alongside a suite of cybersecurity solutions that are designed to conform specifically to the current legal and regulatory landscapes, the prevailing security framework standards, investor ODD expectations and industry best practices, and modern technology infrastructure and design.

## BENEFITS

Predictable IT cost model

Complete IT outsourcing

Scalable solution & model

Dynamic customer portal

Superior client experience

SOC2 certified - Secure & compliant by design

Trained & certified IT engineers

## TECHNOLOGY

Align Cybersecurity has developed and procured a full arsenal of cutting edge, best-of-breed applications, tools, beacons and other technologies, all designed to provide a Managed Service Technology Solution that provides continual monitoring, immediate detection, and real-time response capabilities that live on the cutting edge of technology innovation and man the front lines of cybersecurity defense.

## GOVERNANCE

The Align Cybersecurity team goes beyond the technology and digital barriers necessary to defend and detect attacks and work with each client to provide a bespoke cybersecurity program including policies and procedures, reporting controls, and training initiatives that combine to create a culture of cybersecurity preparedness that works symbiotically with the underlying technology solutions.

## EDUCATION

As a necessary part of the process, Align Cybersecurity educates and empowers employees to toe the line and administer and execute a cybersecurity program through education, empowerment, and accountability with state-of-the-art tools that are engaging, on-demand, and reportable.

# ALIGN CYBERSECURITY™

## Operational Cybersecurity Risk Assessments

Having conducted hundreds of Operational Cybersecurity Risk Assessments on investment advisers of all types, investment programs, sizes and levels of sophistication, the Align Cybersecurity team can provide these assessments and the concomitant recommendations and feedback they generate, swiftly and efficiently.

## Cybersecurity Program Manuals

The Align team works directly with each client to identify, design, draft and implement an appropriate suite of cybersecurity controls commensurate with its unique size, sophistication and level of resources.

## Align Guardian Next-Generation MDR

Align's Guardian Services provides Next-Generation Managed Detection and Response (MDR) to keep organizations safe from constantly evolving cyber-attacks that traditional security defenses simply cannot detect. This allows you to stay focused on your business rather than managing cybersecurity threats and controls.

## Risk CSR-DM Powered by Cavelo

Ditch manual classification and unstructured data with Align's Data Discovery solution powered by Cavelo. Meet shifting regulatory requirements and security use cases head-on with optimized data discovery and next generation Vulnerability Management Services.

## Data Discovery & Mapping

Meet shifting regulatory requirements and security use cases head-on with optimized data discovery and next generation Vulnerability Management Services

## vCISO & Client Portal

Our team of experts can collectively address all the cybersecurity issues and will generate, maintain and catalogue all of the required reports, assessments, tests, audits, inquiries, communications and other documentation, allowing our client to demonstrate both a historical and continued engagement on cybersecurity compliance.

## Cybersecurity Education

The Align Cybersecurity Education solution is designed with investment advisers and the broader financial services firms in mind, incorporating both general and industry-specific training modules and phishing campaigns.

## Managed Data Protection

Securing your data with top-tiered data protection solutions for the hybrid workforce. The Align Cybersecurity team protects your data with complete Microsoft 365 coverage, unlimited storage and retention, and multiple snapshots a day.
