

ASSET
 **POINT**™
2026 ROADMAP

ASSET POINT 2026 ROADMAP

KEY GOALS FOR THIS YEAR INCLUDE

- 1 AI-Powered Intelligence:** Leveraging AI for asset model library maintenance, smart recommendations, lifecycle automation with EOL/EOS alerts, and natural language search capabilities.
- 2 Advanced Visualization & 3D Graphics:** Introducing 3D dimensions for cabinets and asset models, floor plan improvements, row elevation search, and drag-and-drop simulation.
- 3 Reporting & Analytics:** Inventory accuracy reports, growth/shrink trends, audit-ready reporting, improved query builder, and capacity queries tied to snapshots.
- 4 Core Platform Modernization:** Reviewing date and audit entry logic, legacy table cleanup, ServiceNow API enhancements, and improved keyword search.
- 5 Asset Scan Enhancements:** iOS 26 SDK and Xcode updates, Intune framework upgrade, barcode scanning improvements, UH scale support, and package upload fixes.

DEVELOPMENT PLAN 2026

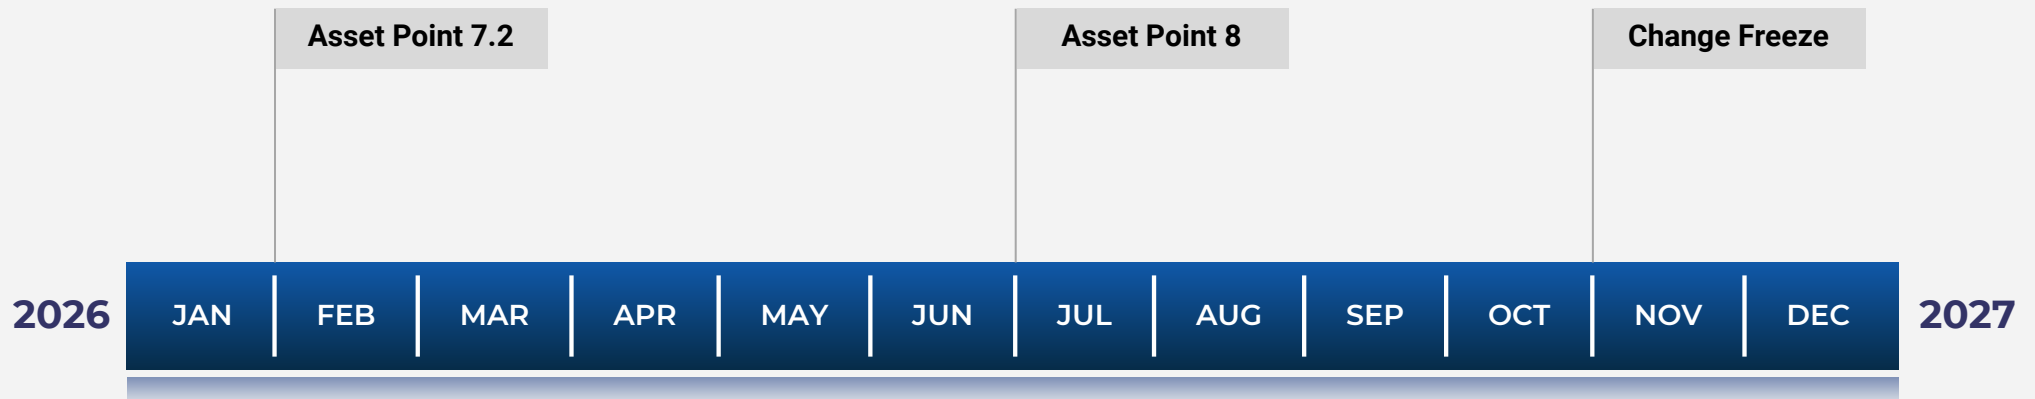

ASSET POINT

(Each release also includes development specific to Asset Scan)

Version AP 7.2: **Available**

Version AP 8: **Q3 2026**

Coordinating with our clients and their schedules, it is our goal is to upgrade all clients within 90 days of a new release

ASSET POINT 8 - Q3 2026

8.1 Release Highlight: AI-powered intelligence, 3D graphics, and enhanced reporting

KEY ENHANCEMENTS	AI-POWERED INTELLIGENCE	ADVANCED VISUALIZATION	REPORTING & ANALYTICS	CORE PLATFORM	MOBILE & SCANNING
AI-Powered asset model library maintenance	●				
Review all date logic on Asset table				●	
Review audit entry logic on Asset & Location tables				●	
Legacy table infrastructure cleanup				●	
Reporting enhancements			●		
ServiceNow API enhancements				●	
Keyword search without leading wildcard				●	●
Improved Query Builder			●	●	
Floor plan visualization improvements		●			
3D graphics (cabinet & asset model dimensions)		●			
Search functionality within row elevation		●		●	
Model names filter on row elevation		●			
Move/Add/Change simulation (drag-and-drop)		●		●	
Asset model image lookup	●	●			

ASSET POINT 8 - REPORTING & ASSET SCAN

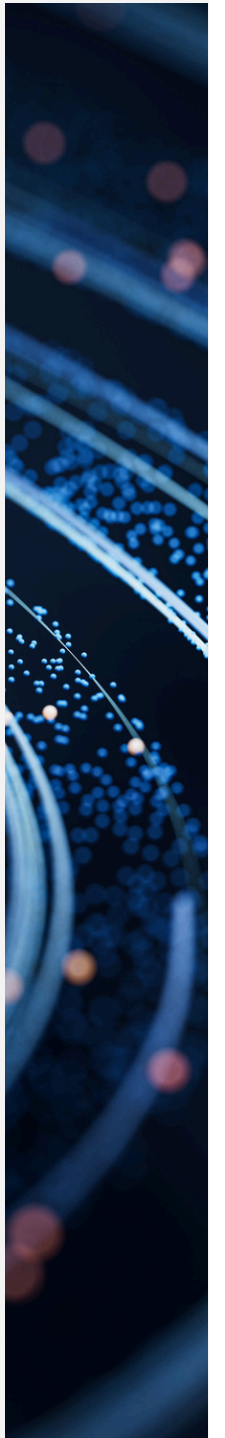

Focus Areas: Smart recommendations, lifecycle automation, and Asset Scan upgrades

KEY ENHANCEMENTS	AI-POWERED INTELLIGENCE	ADVANCED VISUALIZATION	REPORTING & ANALYTICS	CORE PLATFORM	MOBILE & SCANNING
Inventory accuracy reports			●		
Growth/Shrink trend analysis	●		●		
Audit ready reporting (post-inventory)			●		
Improved out-of-the-box queries			●	●	
Capacity queries tied to snapshot	●	●	●		
Smart recommendations (power, utilization, decom)	●		●		
Lifecycle automation (EOL/EOS alerts)	●		●		
Natural language search capabilities	●		●	●	
iOS 26 SDK update & macOS/Xcode changes				●	●
Intune framework upgrade					●
iOS 26 UI updates (bubble button changes)					●
Barcode scanning enhancements & fixes					●
UH scale support on both sides of cabinet		●			●
Review device location change routine				●	●
Bug fixes & new requests		●	●	●	●

ASSET POINT 2026

AI & Visualization Enhancement Advantages

- 1 AI-Powered Asset Management:**
Automated model library maintenance with dimensions, power requirements, and EOL/EOS details. Smart recommendations identify power capacity issues and underutilized racks.
- 2 Natural Language Search:**
Search assets using plain English queries across the entire database. Eliminates complex query building for common searches.
- 3 3D Visualization & Planning:**
Introduction of 3D dimensions at cabinet and asset model level. Drag-and-drop simulation for move/add/change planning before execution.
- 4 Lifecycle Intelligence:**
Automated EOL/EOS alerts keep teams ahead of equipment lifecycle changes. Proactive decommission recommendations reduce risk and improve efficiency.
- 5 Enhanced Reporting & Dashboards:**
Inventory accuracy, growth trends, and audit-ready reports out of the box. Capacity queries tied to snapshots provide real-time infrastructure insights.

ASSET POINT 7.7.2 - NOW AVAILABLE

7.7.2 Release Highlight: Web-based floorplan creation, enhanced cabinet/row elevations, and Visio dependency removal

KEY ACHIEVEMENTS

	DATA DRIVEN DECISION MAKING	STREAMLINING OPERATIONS	IMPROVED USER EXPERIENCE	ENABLE SCALABILITY	ENHANCING SECURITY
Web-based Floor Plan Creation Module	●		●		
Floor Plan Module enhancements (print & export)		●	●		
Cabinet Elevation on-demand generation	●		●		
Cabinet Elevation info layers (tags, hostnames, serial)	●		●		
Row Elevation on-demand views & export	●	●	●		
Asset Model Graphics Module (unified symbols)		●	●	●	
Removal of Microsoft Visio dependency		●	●	●	
Native drawing, editing & symbol management		●	●	●	
Configurable layers & measurement tools			●	●	
Asset Scan native barcode scanning (iPhone/iPad)		●	●		
Barcode scan tracking for audit compliance	●				●
Relocated asset visual overlay (yellow highlight)			●		
Intune & Zero Trust Network Access (ZTNA) support				●	●
Enterprise security & policy-based access					●
Bug fixes & new requests		●	●	●	●
