Align's Innovative AV Solutions

Collaborative AV solutions consisting of premiere technologies — creating a fully connected experience for professionals with best in business cameras, speakers, microphones, and more.

Ready to get started?

Our team will work with you to develop a tailored AV solution that aligns with your unique workplace goals, ensuring a seamless experience for your professionals.

Workplace AV Solutions

Our team understands that every project has unique requirements. This is why the first step of our process is a detailed discovery session to ensure we create a solution that meets your specific needs.

Let's work together to understand:

- How many people is the room being designed for?
- Are the rooms multi-functional?
- Would you like wireless content sharing capabilities?
- Are there any IT security policies that would restrict the use of particular equipment?
- Will participants primarily be in the room or remote?
- Is it important to collect historic usage data, for example real occupancy figures?
- What is your typical shared content, for example, spreadsheets, small text or detailed diagrams?
- Would you like separate displays for remote participants and content sharing?
- Do you need the meeting room system to integrate with a business telephone platform?
- What is your target budget?

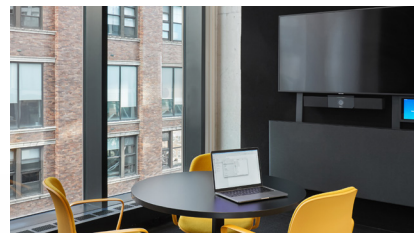

Collaboration Room Solutions from Align

Standard features of collaboration rooms include:
Teams, WebEx & Zoom compatibility and HDMI connectivity.

HUDDLE ROOM

Huddle rooms are designed for collaboration and discussions between two to five people.

Typical features include integrated camera, speakers & microphone.

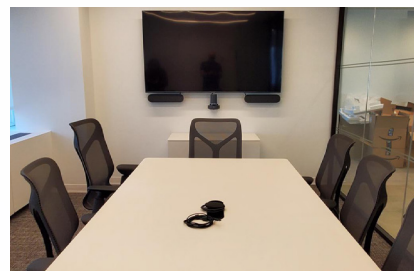

MEDIUM CONFERENCE ROOM

Medium conference rooms offer a larger space for more structured meetings of typically six to eight participants.

Typical features include:

- Video conferencing bar
- Ceiling speakers
- Expansion microphones

EXECUTIVE BOARDROOM

Executive boardrooms typically fit up to 14 people and are designed for large, high-profile meetings:

Typical features include:

- 4k auto tracking PTZ (pan tilt zoom) cameras
- Ceiling speakers
- Beam-forming table microphones
