

ASSET POINT

EXECUTIVE SUMMARY

The impact of AI and HPC demands a new era of data center management. Our Asset Point 2025 Roadmap directly tackles this challenge, building on our industry-leading DCIM solution with insights from clients, partners, market trends, and valuable guidance received during our advisory board meetings throughout 2024.

Asset Point's open architecture makes it the ideal platform to integrate with emerging AI tools. Through our "Process, People, Tools" framework, we provide unparalleled asset visibility and proactive management capabilities, driving efficiency and mitigating risk.

With Asset Point, our partners, and 3rd-party tools, clients can move to proactive data center management by leveraging predictive modelling—to run "what-if" scenarios—in real time. This is a huge step on their journey towards the goal of transparent "Infrastructure Observability".

ASSET POINT

EXECUTIVE SUMMARY CONTINUED

The 2025 Roadmap features a significant upgrade: Asset Scan is now seamlessly integrated into the Asset Point platform. This unified solution, developed with insights from our clients and audit/inventory teams, streamlines your workflows. It is a vital step for achieving infrastructure observability and the transparency required for operational excellence.

Clients are already experiencing the benefits of a simpler, more intuitive interface and dramatically reduced time for scans and changes. This integration reinforces our commitment to delivering a powerful and cohesive data center management platform.

CONTINUED VISION OF ASSET POINT

The Expanded Modules of Asset Point

With Asset Point, you can now unite your team on a single platform and manage the entire lifecycle of your data center operations.

MODULE 1 DISCOVER & ASSESS

We cut through the clutter with comprehensive discovery and assessment, revealing the truth about your hardware, software, and virtual assets.

MODULE 2

PLAN & MIGRATE

From meticulous planning to seamless execution, we'll ensure your technology reaches its destination with minimal disruption and maximum success.

MODULE 3

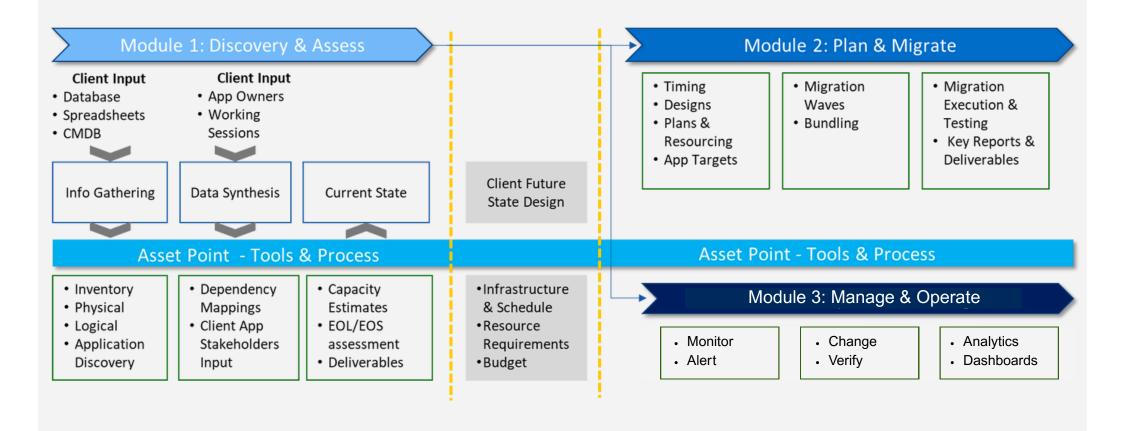

MANAGE & OPERATE

With Asset Point you gain 100% confidence in your data, allowing everyone on your team a single platform to collaborate, change, operate, and manage your data center.

ASSET POINT: LOOKING FORWARD

Other key areas that the team is excited to prepare for roll-out include:

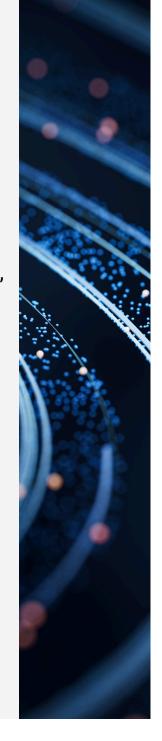

ASSET POINT 2025 ROADMAP

KEY GOALS FOR THIS YEAR INCLUDE

- **Driving Data-Driven Decisions:** Leveraging Al-driven instrumentation and analytics provides valuable insights into data center performance, enabling proactive management and optimization by improving "Infrastructure Observability".
- Streamlining Operations & Reducing Costs: Automated IT Rooms and cabinet naming, improved capacity alerts, and enhanced query-building capabilities simplify complex tasks, minimizing operational overhead.
- Improving User Experience & Productivity: A revitalized graphical interface and intuitive dashboards provide a more user-friendly experience, boosting efficiency and enabling faster decision-making.
- **Enabling Scalability & Future Growth:** Expanded integration and automation capabilities facilitate seamless data exchange, allowing for greater scalability and supporting future growth initiatives.
- **Enhancing Security & Compliance:** SAML Single Sign-On, MFA authentication, and granular user access controls strengthen security posture, ensuring compliance and mitigating risks associated with data breaches.

DEVELOPMENT PLAN 2025

ASSET POINT

(each release also includes development specific to Asset Scan)

Version AP 7.6.2: **Available**

Version AP 7.7.1: July 2025

Version AP 7.7.2: November 2025

Coordinating with our clients and their schedules, it is our goal is to upgrade all clients within 90 days of a new release

ASSET POINT 7.6.2 - JANUARY 2025 (AVAILABLE)

7.6.2 Release Highlight: Enhanced Security via Single Sign On (SSO)

KEY ENHANCEMENTS	MAKE DATA DRIVEN DECISIONS	STREAMLINE OPERTAIONS	IMPROVE USER EXPERIENCE	ENABLE SCALABILITY	ENHANCE SECURITY
SAML Single Sign On, MFA authentication feature					
Move Plan enhancement					
Enhanced grid framework for Asset Point tables					
Monthly scheduler for enhanced tasks automation					
Asset Scan package creation enhancements					
Enhanced verification count tracking					
Search Asset in lost and found bin					
Automatic UH rounding for rack placement					
Package creation date on sync page (iPad/iPhone)					
.Net framework upgrade to latest 4.7 version					
SQL Server 2022 compatibility					
iOS 18+ compatibility					
Latest Intune SDK and Blackberry Dynamics SDK compatibility					
Asset Point help documentation update					
Bug fixes and new requests					

ASSET POINT 7.7.1 - JULY 2025

7.7.1 Release Highlight: Major enhancements to Asset Point graphics

KEY ENHANCEMENTS	MAKE DATA DRIVEN DECISIONS	STREAMLINE OPERTAIONS	IMPROVE USER EXPERIENCE	ENABLE SCALABILITY	ENHANCE SECURITY
Major improvements to Asset Point graphics					
Cabinet elevation graphical transformation and enhanced export functionality					
Major improvements on asset model library maintenance					
Major improvement to floor plan graphics, web based portal for floor plan creation					
Enhanced floor plan functionality with new flexible BI layers and enhanced export functionality					
Web-based draw client application functionality					
Power module enhancement with port level automation					
Power structure improvements					
Dashboard enhancements with enhanced reports and statistics					
Asset Scan app details information on sync email					
Asset Model creation process enhancements					
SQL Server 2022+ compatibility					
Asset Scan iPhone app updates & compatibility with iOS 18+					
Blackberry Dynamics & Mobile Iron SDK upgrades					
Bug fixes & new requests					

ASSET POINT 7.7.2 - NOVEMBER 2025

7.7.2 Release Highlight: Al integrations and enhanced analytics

KEY ENHANCEMENTS	MAKE DATA DRIVEN DECISIONS	STREAMLINE OPERTAIONS	IMPROVE USER EXPERIENCE	ENABLE SCALABILITY	ENHANCE SECURITY
Al Integration for DC instrumentation/analytics					
Web API enhancement					
Asset Point mobile platform enhancement					
World map to present buildings and DCs					
Reporting/query builder enhancements					
Large report export and sync updates to users					
Cabinet validation feature					
Freestanding cabinet shows floating assets					
Graphic enhancements					
Asset Point framework update					
Application security enhancements, group level restrictions					
Asset Scan compatibility with iOS 19					
Mobile Iron upgrade and testing					
Blackberry SDK upgrade and testing					
Asset Scan iPhone app update					
Old iOS deprecated code removal and updates					
Bug fixes & new requests					

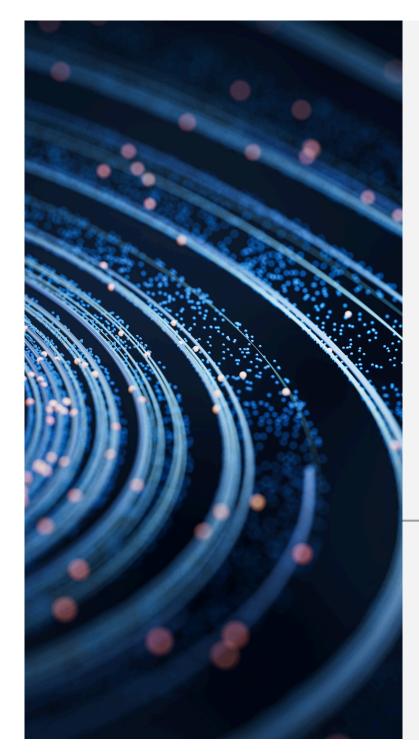

ASSET POINT 2025

Graphics Enhancement Advantages

One of our main priorities for the 2025 Roadmap is to significantly improve our Asset Point graphics. We are focused on this for several key reasons, and the advantages are clear:

- Real-Time Visualization:
 - Provides a dynamic, real-time view of the Cabinet infrastructure and space utilization.
 - Helps administrators quickly identify and respond to issues.
- 2 Enhanced Decision-Making:
 - Offers intuitive dashboards with visual representations of data.
 - Supports data-driven decisions by highlighting performance trends and potential inefficiencies
- 3 Improved Monitoring and Troubleshooting:
 - Allows for interactive analysis of power loads, temperature hotspots, and network connections.
 - Helps in identifying and resolving problems faster with visual cues.
- 4 Better Resource Optimization:
 - Helps in tracking and managing server loads, rack capacities, and energy consumption.
 - Ensures optimal use of physical and virtual resources.
- 5 User-Friendly Interface:
 - Simplifies complex data by converting it into easy-to-understand graphics.
 - Reduces the learning curve for data center staff.
